Project Title: Environmental Impacts of Reclaimed Asphalt Pavement (RAP)

Principal Investigator: John A. Bowden
Affiliation: Assistant Professor, University of Florida
College of Veterinary Medicine

Co-Principal Investigator: Timothy Townsend
Affiliation: Professor, University of Florida
Department of Environmental Engineering Sciences

Completion Date: August 10th, 2021 Phone Number: 941-716-4431

Work accomplished during this reporting period:

During this time the research team has collected and fully leached/analyzed 3 samples of RAP from stockpiles in Gainesville, Jacksonville, and Wildwood. A totals analysis method was finalized. A control sample of virgin hot mixed asphalt provided by the Florida Department of Transportation (FDOT) and Gainesville, Jacksonville, and Wildwood samples were extracted for totals in this time.

Work planned for the next reporting period:

The team will continue sampling and will run full scale leaching/extraction on collected samples. There is no planned TAG meeting for the upcoming quarter.
